

208.2 - Electrical Properties of Dielectrics

SRM 624 is a lead-silica glass block that is intended to validate test methods and for calibrating equipment used to determine the dc volume resistivity of glass per ASTM C 657.

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit of Issue	Geometry and Unit Size	Parameter(s)
624	Lead-Silica Glass for dc Volume Resistivity	200 g	Block 5 cm square 2.5 cm thick	DC Volume Resistivity
